

Texas Outsource Group introduces MedDetect™ reports!

MedDetect™ offers litigators a valuable tool for gaining the most complete picture of a plaintiff's recent medical history, with a focus on prescribing doctors and pharmacies which fill those prescriptions.

Thanks to a special agreement with national Pharmacy Benefits Managers, MedDetect™ reports contain prescription and prescriber information pulled directly from **pharmacy, insurance, and Medicare/Medicaid records**. Texas Outsource Group offers this valuable key information at the low cost of **\$95/report**, with report delivery typically within 24 hours of order placement. With client permission, Texas Outsource Group can also automatically order relevant records from the providers identified in these reports, providing counsel with a more detailed view of patient medical history and potential exposures.

MedDetect™ provides a 5-year listing of:

- Prescribing doctors
- Medications prescribed
- Pharmacy locations where prescriptions filled
- Physician and pharmacy contact information, including phone number and address

MedDetect™ can reveal:

- Undisclosed physicians or treatments
- Evidence of pre-existing conditions
- Whether a patient filled a prescription
- Additional provider records to be retrieved

To place an order for a MedDetect™ report, contact Randy Haynes:
